METRO ONE ANNOUNCES M1 DATA & ANALYTICS

~New Suite of Web-Based Products Enables Company to Extend Reach into New Markets~

PORTLAND, Oregon – June 20, 2006 – Metro One Telecommunications, Inc. (Nasdaq: INFO) today announced that it has launched an enterprise data product line under the name M1 Data & Analytics. The Company, primarily known for its directory assistance services, has expanded its product offering to provide various web-based data analysis tools for enterprises.

Metro One first began selling enterprise data services in 2003 to large data users and has steadily expanded that side of its business. Recently, Metro One substantially enhanced its data services infrastructure and now offers enterprise data to small and mid-size marketers either direct or via an e-commerce web site. The core service provides automatic data update and validation services using the most current Telco information available. M1's services are set apart by the accuracy of our proprietary search algorithms and the speed and capacity of our data service systems.

In addition to launching the web site, the Company has also developed a proprietary service offering that further extends its competitive advantage from others in the data sales industry. These services include Smart Search, a unique algorithm data query product, typically deployed by companies who want to maintain customer and prospect lists as current as possible, as well as Self Service Analytics, a do-it-yourself data analysis tool for marketing list buyers who need to rapidly assess the quality and accuracy of lists. The Company has named Vice President, Philip Ljubicich, as President of the new division.

“We are excited about the opportunities that these new services will bring to Metro One,” said Gary Henry, President and CEO of Metro One. “We have specifically identified product expansion into data services as a key objective for us and we are delighted to demonstrate with

this news today that we are executing on our strategy. As we achieve our milestones, customers and shareholders alike will see Metro One continue to invest in new opportunities which we anticipate will strengthen our business and keep us on the path to profitability.”

The full range of services offered under the M1 Data & Analytics name can be found at www.m1data.com.
